Dubai, UAE | jevina.ae@gmail.com | +971-547407158 | linkedin.com/in/jevina-v

Summary

Software Engineer with 4 years of experience and a strong foundation in back-end development, with a proven ability to deliver high-performance, scalable systems in fast-paced environments. Experienced across fintech and enterprise domains, with a recent focus on real-time trading platforms in the UAE. Known for clear thinking, clean code, and a collaborative mindset that brings value to agile teams. Passionate about building reliable systems that solve real-world problems.

Skills

OS: Linux, Windows

Programming: Python, Java, SQL, JavaScript, HTML, CSS.

Frameworks: Spring, Hibernate, Django, Angular

Tools: Git, JIRA, DBeaver, Jaspersoft

Database: Oracle SQL, Clickhouse

Soft Skills: Problem solving, Teamwork, Communication.

Work Experience

Backend Python and C Developer, *Creed and Bear* – Dubai, UAE

April 2024 – Present

- Worked on the Order Management System (OMS) for high-frequency crypto trading using microservices architecture.
- Integrated with Binance API for market and conditional order execution.
- Integrated NATS for real-time notifications and distributed communication.
- Optimized backend logic for handling high-frequency crypto trades with improved performance and stability
- Conducted testing using pytest to ensure system reliability and accuracy.

Software Engineer, *Larsen and Toubro Infotech Mindtree (LTIM)* – Mumbai, India

June 2021 – Feb 2024

- Led Java-based development for host, adhoc, and batch reporting modules in a core banking environment.
- The applications were migrated from JDK 8 to Open JDK 17.0.2 and Log4j was upgraded to Log4j2, improving security and performance.
- Converted legacy Java frameworks to Spring Framework, enhancing maintainability and scalability.
- Designed and developed Jasper Reports using Jaspersoft Studio for dynamic data visualization.
- Implemented RESTful APIs using Spring Boot and Hibernate for seamless service integration.
- PL / SQL and SQL for complex data retrieval, reporting, and system performance tuning.
- Collaborated in agile teams to ensure timely delivery, code quality, and alignment with client requirements.

Education

Don Bosco Institute of Technology, Mumbai University,

May 2021

Bachelor of Engineering in Information Technology.

Awards & Recognition

- LTIMindtree | Award for 'Shooting Star - Team contributor' January 2024
- Inter College Smart India Hackathon (SIH) | 1st Place December 2020
- Computer Society of India(CSI) - DBIT student Chapter | Public Relations Head January 2020
